Moffett M5

Delivering **Confidence**

Moffett M5

For more than 40 years, Moffett has been manufacturing Truck-mounted Forklifts, a load handling solution that has helped transform the way materials are distributed across the globe. We have a reputation for creating solutions to logistics challenges across a diverse range of industries, ensuring that deliveries arrive on time, in perfect condition and at the most economic price.

Our innovative designs mean that a Moffett can be carried on the rear of a truck or trailer with no loss of load space. There is no more waiting for local off-loading equipment and means safer, faster and more cost effective deliveries.

> Why choose an M5?

The M5 range provides the solution to transferring heavy loads from trucks or trailers and around warehouse facilities. With the ability to work on paved surfaces and firm, off-road conditions, the M5 range has become an important asset in applications such as:

- Building Materials (Timber, Brick, Plasterboard)
- Animal Feed
- Agriculture
- Roofing
- Scaffolding
- Emergency Services...and many more

Along with your new M5 Moffett Truck-mounted Forklift, you already receive numerous items as standard... giving you maximum value for your investment.

- Flashing beacon and work lights for driver safety and confidence
- Reverse beeper, Road lights and interlocking seat belt for additional safety
- Differential Lock to get better grip when driving on rough terrain
- ROPS/FOPS (Rollover/Falling Object Protective Structure) to protect the driver
- Stabilisers for extra stability, loading and unloading in front of the wheels
- New "Clear View" Mast
- Improved Service Access to parts

> But that's not all...

With Moffett, an impressive range of optional extras is available. Whatever the application, we will match it with a customised solution. The M5 standard features can be enhanced with:

- Different tyre options
- Choice of forks
- Choice of lift heights
- Range of attachments

Our extensive service network, in more than 40 countries, offers you high levels of expertise, obtained through their long term link with Moffett and parent company Hiab. Our highly skilled service network team is used to solving just about any challenge. They understand your business and offer you the right advice regarding your load handling needs, be they resolved with a Truck-mounted Forklift or any other product in the Hiab range. Our centralised spares and parts service ensures delivery within 24 hours across Europe and only a few days longer for the rest of the world.

> Lift Assist® and One sided Off-Loading

Our patented LIFT ASSIST® system, consisting of a pantograph reach device, or telescopic forks and a LIFT ASSIST® arm combination, means that 'one man + one machine' can load and unload from the far side of loaded trucks or trailers at full load capacity, negating the need to utilise both sides while saving time and money.

Our commitment to excellence goes beyond technical innovation. With our high quality production process and unparalleled sales and after-sales service, fast spare part deliveries, expert machine servicing and our global Moffett and Hiab dealer network, we all work together as a team to deliver confidence through our total customer care package.

00:00

00:15

00:30

00:50

In less than 1 minute, you are in complete control of the collection and delivery process. That's all the time it takes to mount and dismount your Moffett Truck-mounted Forklift

➤ **M5** – Features and Benefits

Ergonomics

- Improved Steering Wheel position
- Increased Floor Space
- Improved Pedal positions

Styling

- Streamline design
- Composite rear door and bonnet
- Overhead Guard
- New side door does not extend outside machine width
- Consistent with Moffett image

Safety

- Truck and Street Lighting
- "Lower 'N' Go" (fast-mounting system)
- New "Clear View" Mast

Maintenance

- Removable hydraulic tank
- Upgraded Electrics
- Corrosion Resistant panels
- Improved Service Access

4-way models also carry loads sideways, ideal when delivering long loads into tight access areas or through narrow doorways.

	20.3	25.3	20.4	25.4
